JUZO NON-CUSTOM CIRCULAR KNIT LEG STOCKING

MEASUREMENT FORM AND SIZING CHART

Measure in Centimeters

Left □ Right □

Thigh Length ____________ Calf Length ____________

A-g REGULAR LENGTH IS 72-83 CM
A-g SHORT LENGTH 63-72 CM
A-g PETITE LENGTH 55-63 CM
A-d REGULAR LENGTH IS 40-46 CM
A-d SHORT LENGTH IS 34-40 CM
A-d PETITE LENGTH IS <33 CM

For **thigh length**, the length measurement is taken from the floor (at the inside of heel) along the inside of the leg to the inseam/groin, point ‘g;’ this length should end at the gluteal fold.

For **calf length**, the length measurement is taken from the floor (at the inside of heel) along the inside of the leg to approximately 3 ½ centimeters below the crease of the knee, point ‘d’

Silicone borders are not usually recommended for **calf** length stockings, however, they can be necessary for cone-shaped legs.

For **calf and thigh length stockings**, measure with the patient standing.

**Measurement Points**

- Circumference point ‘g’ is found at the inseam/groin
- Circumference point ‘c’ is the largest circumference of the calf
- Circumference point ‘b’ is the point of greatest compression and therefore the most important point. This point is the smallest circumference of the ankle found closest to and above the ankle bone

**Circumference ‘g’ = ____________**

**Circumference ‘c’ = ____________**

**Circumference ‘b’ = ____________**

- Open Toe □ Silicone □
- Closed Toe □ No Silicone □

**Measurement Point for the Body Part (KM) or Hip Attachment**

*The following measurement will be necessary if you are ordering a “custom-made” thigh length stocking to be sewn to a body part.

**Hip circumference = ____________**

*It is common for a Class 1 Body Part (KM) to be sewn to a Class 2 or 3 leg stocking.

**Material**
