MEDI NON-CUSTOM CIRCULAR KNIT ARM SLEEVE MEASUREMENT FORM
AND SIZING CHART

Measure in centimeters

Left ☐ Right ☐

Length Measurement from axilla to wrist (c-g) =

The length measurement is taken from point ‘c’ along the inside of the arm to the inseam, point ‘g’, of the arm; measure with patient sitting and arm extended straight on table.

Measurement Points

Circumference point ‘g’ is taken around the upper arm at the axilla. For ease in determining this point, place a folded piece of paper up into the arm pit area. Point ‘g’ on the arm will be even with the top of the paper. Measure with moderate tension.

Circumference point ‘e’ is found in the middle of the elbow. Measure without tension.

Circumference point ‘c’ is the point of greatest compression and therefore the most important point. This point is found distally on the arm where the wrist meets the hand. One should find the smallest circumference at this point. Measure without tension.

Circumference ‘g’ =

Circumference ‘e’ =

Circumference ‘c’ =

Circumference ‘c1’ =

Item | Class I | Class II | Colors Available
--- | --- | --- | ---
Harmony | 20-30 mmHg ☐ | 30-40 mmHg ☐ | Sand ☐ Caramel ☐ Black ☐
