**THUASNE MULTI-COMPONENT BANDAGE PROTOCOL FOR LYMPHEDEMA REDUCTION**

**STOCKINETTE** – 1<sup>st</sup> layer to protect the skin

**MOBIDERM BANDAGE** – 2<sup>nd</sup> layer, used under a reduction bandage. Mobiderm technology mobilizes edematous or indurated subcutaneous tissue

**BIFLEXIDEAL SHORT STRECH BANDAGE** – 3<sup>RD</sup> layer to help containment of the edema, as well as drainage in case of physical activity (high working pressure. It's made of cotton and viscose. It's soft and breathable.

**BIFLEX MEDIUM STRETCH BANDAGE** – the final layer that is applied for constant pressure, even at rest. Biflex+ graduated is a two-way elastic bandage that provides precise and consistent tension control through the use of fitting indicators
