split sleeve

circaid profile – patient benefit

Custom Feature	Advantage	Patient Benefit
classic foam	Maximum tissue support	Therapeutic treatment for advanced fibrotic tissue
NEW soft foam	Support for sensitive tissue	Therapeutic treatment for mild to moderate fibrotic tissue
classic channel	Allows maximum textured surface skin contact	Textured design helps encourage lymph flow for effective therapy
NEW slim channel	Thinner sleeve	75% thinner sleeve promotes lymph flow and allows greater flexibility around joints
NEW EZ-band	Provides adjustable compression and eases donning	Supports independent application and helps maintain foam contact to the skin for the highest therapeutic effect.
NEW EZ-band Lift	Provides adjustable compression and eases donning with an ergonomic assist	Supports independent application with an ergonomic assist and helps maintain foam contact to the skin for the highest therapeutic effect.
fused EZ-on system	Easily apply sleeve and oversleeve together	Integrated design allows sleeve and oversleeve to be applied together for easy one-step wear
split sleeve	Simple hand access	Easily remove and reapply the hand portion whenever needed

NEW EZ-band and EZ-band Lift

EZ-band lift

EZ-band

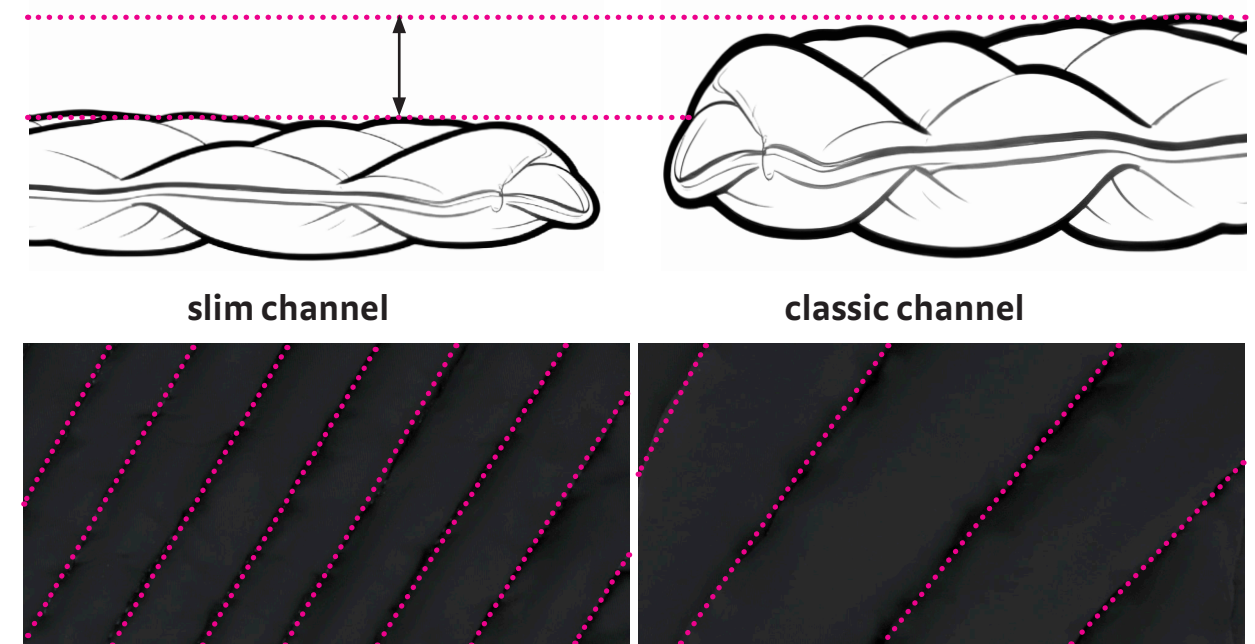

Adjust bands as needed

Allows sleeve opening at customer specified locations

NEW circaid profile slim channel
